

EPLASS in practice

- EPLASS manages a multitude of major infrastructure projects for DB Netz AG, DEGES, Autobahndirektion Nord- und Südbayern, Straßen.NRW and Hessen Mobil, as well as many other state authorities and public clients. Depending on the project, user numbers can vary between 10 and 1,000.
- EPLASS has been entrusted with well over 90% of the previous infrastructure PPP projects in Germany!
- EPLASS manages many BIM pilot projects, such as the Rastatt Tunnel, additional sections of the Karlsruhe–Basel high-speed railway, Munich–Salzburg upgrade section 38 (DB Netz AG), Westendbrücke (DEGES), A99 BW 27/2 BIM pilot (Autobahndirektion Südbayern), Eschwege BIM pilot (Hessen Mobil), and four BIM pilot projects for the Lower Saxony Federal State Authority for Road Engineering and Traffic.

SUCCESSFUL PROJECT DELIVERY WITH EPLASS

Secure CDE for intelligent digitalization

Customer feedback

"EPLASS has helped us to optimize drawing coordination and speed up approvals. It was definitely a key to overcoming the complex challenges encountered in an inner-city mega-project."

Michael Ditandy (Team Leader of the Stuttgart 21 major project with Wendlingen–Ulm HSL)

"EPLASS provides me with plenty support during project execution. I never lose sight of the drawing status, because I can always see what document is in what processing step.

Digitalization means I no longer need to keep schedule lists, make multiple copies of drawings, or hold marathon signature sessions.

The software can be programmed for the project's specific requirements and readjusted as needed. It's an absolute relief for every complex construction project!"

Maximilian Scholz (Project Engineer in the Karlsruhe–Basel major project)

"Our EPLASS team is proficiently and passionately committed to your projects' success. We look forward to continuing our positive partnerships with our customers!"

Dipl.-Ing. (FH) Andreas Fersch,
CEO of EPLASS project collaboration GmbH

Use the cloud-based EPLASS platform for maximum project success.

EPLASS is a cloud-based project platform used for the digital controlling of infrastructure projects. Using intelligent digitalization, we ensure a successful project delivery, whilst cutting down the time, effort and costs involved.

EPLASS develops digital solutions for the construction industry and supports cross-company cooperation in customers' drawing and document management activities. The range also includes solutions for process management, such as building information modeling (BIM).

Having acquired over 20 years of experience in digital drawing management, EPLASS is proving its professional expertise in managing all sizes of construction project and infrastructure measures. Whether you're dealing with small or large projects, infrastructure, public-private partnerships or public clients – the more complex the processes, the greater the benefits that EPLASS offers. Benefit from a structured, efficient and secure cooperative relationship with EPLASS.

EPLASS is the ideal solution for any size of project. Individual or standardized.

EPLASS supports your project:

- Construction intelligence platform
- Cut costs
- Make efficient use of existing resources
- Receive individual advice and support from our EPLASS specialists
- Analyze and automate processes
- Optimize internal and external processes
- Minimize potential risks
- Integrate external stakeholders – cross-company project cooperation

Make the most of the digital transformation to boost your productivity and continuously evolve your business instead of being overtaken and left behind by others.

Use EPLASS as a construction intelligence platform:

- Revive traditional working methods
- Redefine processes with intelligent, digital project processing

Distinct structures, complete information and transparent processes guarantee maximum project success. And that's why experts have been choosing EPLASS for decades.

EPLASS offers options that'll get you ahead:

- Intelligent digitalization (drawing, documents, models)
- Workflow-based assignments (customized to the project)
- Automated reviewing and approval process
- Changes via graphical review entries = Redlining (original application files are retained)
- Electronic signature for approving drawings
- No local installation necessary
- Assistance by a dedicated project manager and Support
- Data security according to the GDPR and ISO 27001:2013 in our TÜV- and ISO-certified data centers

Benefit from substantial advantages in the project as a client or company:

- Transparency and traceability
- Distinct structures
- Control over deadlines and upcoming tasks
- 20 years of experience with drawing and document management
- Optimized interface coordination

Professionalism and practicality – that's what today's progressive work is all about. With EPLASS.
