

# The Benefits of EPLASS

## PREDEFINED WORKFLOWS MANAGE COMPLEX PROCESSES

- Parallel, simultaneous review process
- Automatic creation of e-mails (e.g. plotting orders, notification mails)
- Documentation of workflows (history and protocol)

## BATCH UPLOAD VIA DRAG&DROP

- User friendly batch upload
- Upload also via e-mail, Excel, FTP and EPLASS Upload App

## AUTOMATIC DATA CAPTURING FROM PDF DOCUMENTS

- Data capturing of e.g. document number or description
- Data capturing of return address or subject of a letter
- Recognition and printing of barcodes and QR-Codes

## AUTOMATIC SCHEDULING MANAGEMENT AND REPORTING

- Graphic reports with "traffic light symbols"
- Including deadlines and milestones
- Individual reports on the basis of MS Excel
- Periodical, automated reports via e-mail
- Dashboards – project overview

## HIGH-PERFORMANCE VIEWER

- Display of drawings and other related documents (approx. 200 formats)
- Visual comparison of documents with automatic indication of differences
- Enables processing of forms and templates

## ENTRY OF GRAPHIC REVIEW AND MARKUPS (REDLINING)

- Review of documents directly on the platform without downloading the document
- Automatic combination of all redlinings after a parallel review process
- Automatic allocation of redlining color

## SIGNATURES AND PAPER INTERFACE

- Display of release status with date and digital "signature" directly on plotted drawings (also available via SignPad)
- Integration of 2D barcodes for workflows in hardcopy form

## ADDITIONAL MODULES AND INDIVIDUAL PROCESSES

- Claim Management
- Quality Management
- Fault Management
- Other various processes can also be implemented in EPLASS quickly

## INTEGRATED DOCUMENT MANAGEMENT

- Central address administration
- Filing, editing and distributing of internal and external correspondence (e.g. letters, invoices, e-mails)
- Photo documentation, daily construction records, (optional) optical character recognition

## REFERENCES AMONG VARIOUS PROJECTS

- Projects of every dimension (up to several billions of €)
- Infrastructure, structural engineering, civil engineering, tunneling, energy etc.
- Projects all over the world

EPLASS is the fully integrated, workflow-based, project collaboration platform for the efficient control, coordination and processing of projects of any dimension, from anywhere, at any time, using any device.

By means of its' exceedingly efficient workflow engine, EPLASS can map out the most complex processes. EPLASS workflows make your processes quicker, more transparent, organized and secure. The extraordinary level of possible automations make EPLASS stand out among its competitive software.

The project platform EPLASS integrates all necessary programs (viewer, uploader, text- and table processing, etc.) in order to provide the end user with a comprehensive review process in digital and automated manner.

Due to these and many more reasons, EPLASS is the preferred solution for construction design management, document management and process management of many large construction projects.
